

CHEERTAINER vs. Jerry Can

The Cheertainer® is a new generation bag-in-box.

The innovative and improved bag-in-box system consists of a gusseted, form-fit multi-ply bag to maximize space and productivity.

With the Cheertainer, you get the best of both worlds; flexibility of a bag-in-box with the benefits of a rigid container.

Here's why Cheertainer is a superior packaging choice.

SUSTAINABILITY

Improves your company's environmental record by providing an eco-friendly product.

Cheertainer production reduces greenhouse gas consumption by 95%, compared to a Jerry Can.
Cheertainer is manufactured with 95% less energy than a Jerry Can.
Cheertainer reduces plastic consumption by 66% over a Jerry Can.

Creates a 10-1 space savings advantage over Jerry Cans, reducing the use of fuel and greenhouse gas emissions.

10 truckloads of Jerry Cans can be replaced by 1 truckload of Cheertainer.

Improves palletization efficiency allowing for more product per pallet.

Provides a cost-savings opportunity by using fewer pallets and reducing the internal expenses associated with inventory transport.

CHEERTAINER PERFORMANCE BENEFITS

Fills without air, reducing foaming and splashing.

Minimizes product contamination and ensures product purity.

With Jerry Cans, the product is exposed to outside elements during the filling process, risking contamination. The use of Cheertainer keeps product protected during the filling process.

Cheertainer offers an option of aseptic product for customers needing a system used to package product in a sterile process.
