Drink mixes
Iced tea
Juice
Juice concentrates
Lemonade
Liquor
Soft drink ingredients
Tea
Water
Wine

END-USERS

Beverage Producers
Catering
Contract Fillers & Co-packers
Convenience Stores
Corrugated Manufacturers
Distributors
Institutions
Manufacturing/Processing Plants
Restaurants
Supermarkets
Wholesale Stores

ISSUES WITH CURRENT PACKAGING

- Difficulties in evacuating product / difficult to pour
- Unhygienic
- Food products are typically siphoned into smaller bottles during pouring (heavy multi-liter bottles are difficult to pour) creating a lot of waste
- Viscous product can stick to the outside and opening of the bottle or tin where dirt easily accumulates
- Packaging disposal options

CHEERTAINER MANUFACTURER BENEFITS

- Significant cost savings in logistics and storage costs
- Reduces costly price fluctuations by using 80% less plastic than rigid containers
- Able to be UN certified
- 30% reduction in handling costs
- Tamper-evident fitment options
- Increased space for marketing

CHEERTAINER END-USER BENEFITS

- 99.9% dispensing without surging or glugging
- Pouring tap allows more precise measurements for restaurant / food industry use
- Easy to handle, fill and store
- Fills without air, resulting in no foaming or splashing
- Closed-loop dispensing enhances food safety
- More user friendly- fitment always in dispense position
- Clean pouring tap
- Hygienic pouring tap
- Eliminates internal cleaning costs associated with alternative rigid packaging

BEVERAGES

CHEERTAINER ENVIRONMENTAL BENEFITS

- 10:1 logistical transportation advantage, reducing fuel consumption and CO₂ /greenhouse gas emissions
- 89% fewer CO₂ emissions during production than competitive rigid packaging
- 50% fewer CO₂ emissions during transport than competitive rigid packaging

SIZES

Up to 25L

FILM OPTIONS

Standard barrier- laminated polyethylene/ nylon
High barrier- laminated polyethylene/nylon/ EVOH
Metalized- polyethylene/metalized polyester
Other custom films

FILLER OPTIONS

The Semi-Automatic filler is a bag-in-box filler, capable of filling a wide range of shelf stable or extended life products up to 25L. The filler has full CIP (clean in place) and SIP (sterilize in place) modes and can be steam sterilized.

The Fully-Automatic filler is a compact web-fed fully auto filling machine capable of filling a wide range of shelf stable or extended life products up to 25L. The filling head has been designed to give optimum fill quality without any spillage. The filling machine has full CIP (clean in place) and SIP (sterilize in place) modes and can be steam sterilized.

Semi-Automatic Filler

Fully-Automatic Filler
