

CHEMICALS

The Cheertainer® is a gusseted, form-fit multi-ply bag that gives you the best of both worlds; the flexibility of a bag-in-box, as well as the benefits of a rigid container.

APPLICATIONS

Adhesives
Automotive lubricants
Automotive oils
Car wash chemicals
Coatings
Detergents
Disinfectant
Dyes
Floor wax
Ink
Multi-purpose cleaners
Non-bleach additives
Paints
Petroleum
Sanitizers
Sealants
Soaps
Solvents
Stains
Strippers
Swimming pool chemicals
Thinners
Varnishes

END-USERS

Contract Fillers
Contractors
Corrugated Manufacturers
Distributors
Home Improvement Stores
Institutions
Manufacturing/Processing Plants
Supermarkets
Wholesale Stores

ISSUES WITH CURRENT PACKAGING

- Inefficient product evacuation can lead to product loss
- Rigid packaging prevents customization
- Environmental concerns
- Packaging disposal options
- Current packaging not tamper-evident

CHEERTAINER MANUFACTURER BENEFITS

- Significant cost savings in logistics and storage costs
- Custom solutions for some chemicals
- Customizable dispensing options to best suit product
- Tamper-evident fitment options
- Reduces costly price fluctuations by using 80% less plastic than rigid containers
- 30% reduction in handling costs
- Able to be UN certified
- Increased space for marketing

CHEMICALS

CHEERTAINER END-USER BENEFITS

- On-tap dispensing / controlled portion flow
- 99.9% dispensing without surging or glugging
- Easy to handle, fill and store
- Fills without air, resulting in no foaming or splashing
- Water-resistant box for exterior use
- More user friendly- fitment always in dispense position
- Eliminates internal cleaning costs associated with alternative rigid packaging

CHEERTAINER ENVIRONMENTAL BENEFITS

- 10:1 logistical transportation advantage, reducing fuel consumption and CO2 / greenhouse gas emissions
- 89% fewer CO2 emissions during production than competitive rigid packaging
- 50% fewer CO2 emissions during transport than competitive rigid packaging

SIZES

Up to 25L

FILM OPTIONS

Standard barrier- laminated polyethylene/ nylon
High barrier- laminated polyethylene/nylon/ EVOH
Metalized- polyethylene/metalized polyester
Other custom films

FILLER OPTIONS

The Semi-Automatic filler is a bag-in-box filler, capable of filling a wide range of shelf stable or extended life products up to 25L. The filler has full CIP (clean in place) and SIP (sterilize in place) modes and can be steam sterilized.

The Fully-Automatic filler is a compact web-fed fully auto filling machine capable of filling a wide range of shelf stable or extended life products up to 25L. The filling head has been designed to give optimum fill quality without any spillage. The filling machine has full CIP (clean in place) and SIP (sterilize in place) modes and can be steam sterilized.

Semi-Automatic Filler

Fully-Automatic Filler
