

worldwide innovator in flexible liquid packaging

FOR IMMEDIATE RELEASE

CDF exhibiting flexible packaging at the PPC Spring Meeting

Plymouth, MA, March 5, 2014- CDF Corporation, a global company that specializes in the manufacture and sale of high quality [pail](#), [drum](#), [intermediate bulk container](#) and [bag in box liners](#) and [flexible packaging](#), will exhibit bag-in-box liners and drum and pail products at the Petroleum Packaging Council's Spring Meeting and Tradeshow.

The Petroleum Packaging Council's Spring Meeting and Tradeshow will be held March 16th to the 18th at the Renaissance Tampa International Plaza Hotel in Tampa, Florida.

CDF has a wide range of flexible products to satisfy the needs of product manufacturers and producers. CDF's liners for intermediate bulk containers, drums and pails provide outstanding performance in critical lubricant applications.

The [Cheertainer](#) is an environmentally-friendly alternative to traditional packaging. Its unique form-fit [bag-in-box](#) design minimizes packaging requirements and maximizes transportation and storage efficiency, providing an eco-smart solution.

CDF has the industry's most comprehensive selection of drum and pail liners and accessories. Our products range from tough, leak-proof, [vacuum-formed inserts](#), to economical, [round-bottom liners](#) to the special protection of [barrier-film liners](#). These liners and inserts can be used with many chemical applications, such as adhesives, automotive, coatings, detergent, greases, ink, lubricants, paint, sealants and soap.

The [Smart Pail](#) was developed to offer a more sustainable and cost effective system for transporting semi-viscous, solids and some liquids traditionally shipped in plastic pails. The Smart Pail is a semi-rigid, flexible vacuum-formed plastic liner with a unique wide-mouth laminated peel-reseal lidding film structure offering tamper evidence, easy open-close, excellent oxygen barrier and efficient disposal. The Smart Pail is inserted into a specifically designed corrugated box and stacked 48 units per 40" x 48" pallet for transportation. The end-user simply peels open the peel reseal label, cuts the tamper evident film and pumps, scoops or pours the contents. The peel-reseal lidding can be open and closed multiple times. The Smart Pail is easily collapsed - ready for disposal or recycling. Four collapsed Smart Pails fit into one 5 gallon pail - saving space, time and the environment!

About CDF Corporation

[CDF](#) Corporation is a privately held flexible packaging company that leads the U.S. market in liners for industrial containers and custom packaging solutions. Since its inception in 1971, the company has maintained an entrepreneurial approach to industrial packaging, manufacturing and promotion. CDF manufactures products ranging in sizes from 2 gallons to 330 gallons in its Plymouth, Massachusetts ISO certified facility. www.cdf1.com
