

worldwide innovator in flexible liquid packaging

FOR IMMEDIATE RELEASE

CDF to showcase Smart Pail®, EZ-Flo™, Bag in Box and IBC liners at Pack Expo 2014

Plymouth, MA, August 15, 2014 - CDF Corporation, a global company that specializes in the manufacture and sale of high quality [drum](#), [pail](#), [intermediate bulk container](#) and [bag in box liners](#) and [flexible packaging](#), will exhibit CDF's newest products, the EZ-Flo Packaging/Dispensing System and IBC liners for stainless steel totes. There will also be live interactive Smart Pail and [bag in box](#) equipment demos in booth# 7664 Lakeside Upper.

Pack Expo International will be held November 2nd to November 5th at McCormick Place in Chicago, Illinois. The tradeshow allows representatives of companies from around the world to experience and discover the newest innovations in the processing and packaging markets. <http://www.packexpointernational.com>

Representing CDF will be Joe Sullivan, President; Tom McCarthy, General Manager; Joe Wanner, Smart Pail Product Manager; Jimmy Pigg, Flexible Packaging Engineer; Iris Thomas, Flexible Packaging Product Manager; Mark Sinn, EZ-Flo Product Manager; and Dave Christian, Jim Gillis, Jayne Handscom and Jake Sullivan, Sales Representatives.

The Smart Pail, a plastic pail replacement system, was developed to offer a more sustainable and cost effective system for transporting semi-viscous, solids and some liquids traditionally shipped in plastic pails. The [Smart Pail](#) is a semi-rigid, flexible vacuum-formed plastic liner with a unique wide-mouth laminated peel-reseal lidding film structure offering tamper evidence, easy open-close, excellent oxygen barrier and efficient disposal.

The [bag in box](#) liner is the ideal packaging solution for chemical, food, beverage and cosmetic applications ranging in size from 1 liter to 25 liters. CDF offers both form-fit and pillow styles to meet your entire bag in box needs. BIB flexible packaging offers many benefits, such as excellent quality due to superior seam strength and there is no foaming or splashing because the package fills without air.

The EZ-Flo Packaging/Dispensing System is an environment-friendly dispensing alternative to traditional squeeze, pump and spray bottles. The [EZ-Flo](#)'s innovative dispensing system uses patent pending technology to dispense products of various viscosities without the assistance of gravity. The system is cost effective, reducing waste, time and labor, while improving overall productivity.

The [Air-Assist](#)® liner allows the user to realize a more complete evacuation of their product. Less residual product is left inside the liner, resulting in savings to the user. Air-Assist liners are specifically designed for high viscosity products.

Pack Expo tradeshow aim to advance the processing and packaging industry around the world. You can expect to find thousands of engaged attendees, interactive education, and the latest technology and innovations in processing, packaging, and pharmaceutical lifecycle solutions.

About CDF Corporation

[CDF](#) Corporation is a privately held international company that specializes in the manufacture and sale of high quality pail, drum, intermediate bulk container and bag in box liners and flexible packaging. CDF manufactures products ranging in sizes from 2 ounces to 330 gallons in its Plymouth, Massachusetts ISO certified facility.
