## Multiple Sizes

CDF manufactures liners for all intermediate bulk container sizes.

## Multiple Fitment Choices

CDF fitments are available in a variety of sizes.

## Material Choices

All liners are made in America. The inside layer is made from FDA-approved films.

**EVOH** film is widely used in the food packaging industry. It is a strong, flexible, transparent film with good moisture and excellent oxygen barrier specifications.

**Barria™** metallized polyester provides an oxygen and water vapor barrier.

**Flexus™** and **Flexus HF** metallocene LLDPE are for general use and provide durability and flex crack resistance.

**Tenalon™** co-extruded nylon film provides abrasion resistance, durability and strength.

The film materials used in the manufacture of our IBC liners comply with FDA Regulations 21 CFR 177.1520, CFR 175.105, 177.1390 and CFR 177.1630.

We guarantee that our liners will be constructed from the specified materials and that CDF will not knowingly use materials that are out of specification or could be adulterated. No additives are introduced during the heat-sealing process.

## Custom Designs

CDF will always consider custom designs.
