

UltraLiner™

Steel Drum Liners

UltraLiner blow molded liners are CDF's best-performing drum liners. UltraLiner premium drum liners are ideal for heavy stress operations requiring maximum strength and protection. UltraLiners are designed with an ultra-thin lip to help meet UN performance standards for shipping regulated products.

Benefits

- Specifically designed for UN performance tests, each user must acquire UN certification independently
- Heavier than standard drum liners
- Can withstand the most rigorous pumping and mixing
- Blow molded for seamless protection
- Ensures the absolute purity of your product
- Provides protection against drum corrosion
- Environment-friendly packaging, helps users to reach sustainability goals
- Reduces drum cleaning and reconditioning costs

UltraLiner™

Steel Drum Liners

Size

UltraLiner blow-molded liners are available for 55 gallon steel drums.

Material Choices

All liners are made in America from FDA-approved films.

UltraLiners are blow-molded from low-density polyethylene to form a smooth wall that makes them easy to install. A unique, ultra-thin contoured lip snaps over the top bead for an *ultra-secure* lid fit.

Low-density polyethylene is intended for general use and provides superb tensile strength and elongation, as well as high resistance to tears and flex cracking. Low-density polyethylene is designed for applications up to 175°F.

Anti-stat contains an internal anti-stat agent to aid in the reduction of static build-up, thus reducing dry chemical static cling and chance of ignition of flammable materials.

Custom Designs

CDF will always consider custom designs.
